

# ANA Bond™

Light-curing bonding

**ANA Bond™** is the 5<sup>th</sup> generation LC bonding with excellent adhesion to both dentin and enamel.

This bonding ensures a safe and strong adhesion to both dentin and enamel, as well as lining material, glass ionomers and cements. A safe and strong bonding is as important as the filling material, to ensure the treatment and overall quality. "My name is Bond, ANA Bond!"

## INDICATIONS

- Adhesive to all material
- Total-etch-technique

## PROPERTIES

- High adhesion
- Long-term lasting
- Easy to use
- Hydrophilic

## ASSORTMENT

- ANA Bond™, 1 x 5ml 1321000
