

ANA Fulfill™

Universal composite

ANA Fulfill™ is a LC universal composite for both anterior and posterior filling and all cavity classes.

Thanks to the optimal and unique formula it is easily handled, adopts very well to the cavity walls but do not stick to the instrument. The minimal shrinkage, high gloss polishable and translucency also makes it optimal for veneers. **ANA Fulfill™** is the product if you look for quality and aesthetics results.

INDICATIONS

- Restorations of all classes
- Veneer creations
- Enamel hypoplasia treatments

PROPERTIES

- High-gloss polishable
- Color stable
- Radiopaque
- Very low shrinkage
