

ANA Fulfill Flow™

Flowable composite

ANA Fulfill Flow™ is a light-curing, flowable, composite for direct restorations of class III, IV and V.

The outstanding thixotropic consistency makes the material stay in place and shape but at the same time adoptable and fluid when manipulated. **ANA Fulfill Flow™** gives an excellent aesthetics and is polishable into shine beyond. The very low shrinkage gives the increased protection against secondary caries.

INDICATIONS

- Restorations of class III, IV V
- Bis-acrylate repairs

PROPERTIES

- High-gloss polishable
- Color stable
- Radiopaque
- Very low shrinkage
